OBJECTIVE

I want to become Junior Java Developer, increase my proficiency in DataBase-WebSite making and hope to find companions to work with.

SUMMARY

I have finished complete Java Developer course in Logos IT Academy and have some practical experience in creating complete Websites like simple Working Library and Registration form using Maven technologies with a help of the Spring.

My analytical abilities are on the high level, also I am able to quickly assimilate knowledge and use it efficiently.

SKILLS

Javacore, SpringBoot, Spring Security, JDBS, REST, ORM, Maven, GitHub, Cloudinary, Json, MySQL, HTML, CSS, Js

EXTRA SKILLS

- Searching: Confident user of Google search, so it's easy for me to find information in the Internet. Often use StackOverflow.com for finding some advices and solutions of my problems.
- Social Skills: I can easily work and assimilate with the team. I take an adequate approach to criticism. If I don't know how to solve the problem, I can find the solution with different methods. Maybe it'll take some time, but I'll get it.

MY PROJECTS AND EXPERIENCE

My repository in Github: <https://github.com/olegg2/>.

- I finished Library website using vast stack of technologies: from Spring frameworks and solutions, to frontend tools and languages like bootstrap, javascript, jquery, ajax.
- This is url to Library project repository : <https://github.com/olegg2/Library/tree/master>.
- I made many simple projects with java like **tic-tac-toe**, **sea battle** and **primitive economy strategy**.
- Had practice with MySql and used JDBS.
- Made simple Unity game (spaceship battle).
