OBJECTIVE

I want to become Junior Java Developer, increase my proficiency in programming and hope to find companions to work with.

SUMMARY

I have finished complete Java Developer courses in Logos IT Academy and Kindgeek company. Moreover, I have some practical experience in creating complete websites like Online shop and Library with a help of the Spring and its modules.
My analytical abilities are on the high level and I am able to quickly assimilate knowledge and use it efficiently.

SKILLS

Java Core, Spring, Spring Boot, Spring Data, MVC,
JDBC, Hibernate,
Maven, GitHub, Cloudinary,
Json, MySQL,
HTML, CSS, Js, Jquery, Ajax (request,response).

MY PROJECTS AND EXPERIENCE

My repository in Github: https://github.com/olegg2/.

- I finished Online shop and Library websites using wast stack of technologies: from Spring framework with it modules, to front-end tools and languages like bootstrap,javascript,jquery,ajax.
- This is url to Online shop project repository : https://github.com/olegg2/onlineShop.
- This is url to Library project repository : https://github.com/olegg2/Library/tree/master.
- I made many simple projects with java like tic-tac-toe, sea battle and primitive economy strategy.
- Had practice with MySql and used JDBC.
- Made simple Unity game (spaceship battle).

EXTRA SKILLS

- Searching: Confident user of Google search, so it's easy for me to find information in the Internet. I often use StackOverflow.com for finding some advices and solutions of my problems.
- Social Skills: I can easy work and blend with the team. I take an adequate approach to criticism. If I don't know how to solve the problem, I can find the solution with different methods. Maybe it'll take some time, but I'll get it.
